The following projects met 100% of their applicable targets in March 2020:

- **Illumination Foundation** - CSA ESG Homeless Prevention
- **Pathways of Hope** - POH Prevention
- **South County Outreach** - Homeless Prevention

**Goal 3 - Decrease Length of Time in Prevention Projects**

- 2019 August: 122
- 2020 March: 102

**Goal 6 - Help Adults Maintain or Increase Their Income During Enrollment**

- 2019 August: 81%
- 2020 March: 25%

**Goal 7 - Help Adults Maintain or Increase Their Income at Exit**

- 2019 August: 77%
- 2020 March: 83%

**Goal 8 - Help Clients Exit to Successful Housing Situations**

- 2019 August: 94%
- 2020 March: 95%

**Goal 12 - Ensure Clients Do Not Return to System After Receiving Prevention Services**

- 2019 August: 11%
- 2020 March: 15%
## HP Project Scores For Applicable Goals: March 2020

**Reporting Period:** 1/1/2019 to 12/31/2019

</table>
For the March 2020 analysis, 7 out of 15 projects (47%) met Goal 3’s criteria of an average length of time in project of 60 days or less.

39% of clients were served in Homeless Prevention projects for longer than 2 months but less than one year, while 5% of homeless clients were served in Homeless Prevention projects for more than one year. It is important to enter project start and project exit dates into HMIS in a timely manner to ensure accurate reporting.

**Possible Action Item:**
What can be done to engage Homeless Prevention projects and increase their participation in HMIS?

Just over half of all clients enrolled in Homeless Prevention projects have a length of stay of 60 days or less.

**Possible Action Item:**
Discuss scenarios that could lead to lengths of stay in Homeless Prevention projects of more than 60 days. Are projects set-up correctly for the services they are providing?
Goals 6 & 7 - Help Adults Increase Their Income  
During Enrollment and By Project Exit

1 out of 4 projects (25%) met Goal 6’s target of helping at least 40% of adult clients maintain or increase their income during their time of enrollment.

11 out of 11 projects (100%) met Goal 7’s target of helping at least 35% of adult client to maintain or increase their income when exiting during the reporting period.

**Possible Action Item:**
Should the target for Goal 7 be increased to reflect the project type's ability to meet the current target?

In order to be included in the Stayers measure, stayers must have a length of at least 365 days. 67% of these stayers have not had an Annual Assessment completed, meaning their income has not yet been updated in HMIS. As a result, there is a significant percentage of stayers that are missing income (58%). Collecting the annual assessment data will significantly improve the success rate for this measure.

**Possible Action Item:**
What would help agencies collect this data?

A majority of leavers are able to maintain their cash income throughout their time in the project and only a small percentage experienced a decrease in income. 14% of clients have no cash income.

**Possible Action Item:**
Should clients who enter with no cash income be connected to employment resources or receive targeted assistance in applying for benefits?
552 of out 583 clients (95%) exited from Homeless Prevention projects successfully!

75% of Homeless Prevention projects are currently meeting the target for this measure that 90% of clients should exit to permanent housing locations.

**Possible Action Item:**

Should the target for this measure be increased to reflect the performance of the project type?

---

**Goal 8 - Help Clients Exit to Successful Housing Situations**

Of those 552 clients exiting Homeless Prevention projects successfully, 95% have remained in the housing unit that they rent or own. The remaining 31 (5%) have moved on to live with family and friends.

Of the clients that are not exiting to permanent housing situations, the majority of clients are missing destination data. The second largest group of clients exiting to unsuccessful destinations are those exiting to homelessness.

**Possible Action Item:**

What causes clients to exit without completing an exit interview? What causes clients to exit to locations that are not permanent housing?
8 out of 13 projects (62%) met the target for Goal 12 that no more than 15% of clients return to the Continuum of Care (System), including Homeless Prevention projects, after exiting to a permanent housing situation.

The majority of clients who exit from Homeless Prevention projects to permanent destinations and later return to another Homeless Prevention project do so within 6 months of their initial exit.

Of clients who exit Homeless Prevention projects to permanent housing and return to homelessness, most also return to the OC CoC within 6 months of initial exit.

The majority of clients who return to the System after exiting a Homeless Prevention project return to another Homeless Prevention project.

Possible Action Item:
Should the assistance provided to Homeless Prevention clients be lengthened to decrease the number that return to the Homeless System?
