I. Background & Purpose

The Homeless Management Information System (HMIS) is the electronic data collection system utilized by the Orange County CoC to comply with the responsibilities outlined in 24 CFR 578.7(b) for designating and operating an HMIS. HMIS is the local information technology system requirements that U.S. Department of Housing and Urban Development (HUD) funding recipients and subrecipients use for homeless assistance programs as authorized by the McKinney-Vento Homeless Assistance Act. The Homeless Emergency Assistance and Rapid Transition to Housing (HEARTH) Act codifies in law certain data collection requirements integral to HMIS. The HEARTH Act requires that HUD ensure operation of and consistent participation by recipients and sub-recipients in an HMIS compliant software. Current HMIS standards are included in the 2004 Technical Standards and the 2010 Data Standards.

HUD and other planners and policymakers use aggregate HMIS data to better inform homeless policy and decision making at the federal, state and local government levels. HMIS enables HUD to collect aggregate data at the national-level on the extent and nature of homelessness over time. Specifically, an HMIS can be used to produce an unduplicated count of homeless persons, understand patterns of service use, and measure the effectiveness of homeless programs. Data on homeless persons is collected and maintained at the local level. HMIS implementations can encompass geographic areas ranging from a single city to an entire state.

The HEARTH Act also requires that all communities have an HMIS with the capacity to collect unduplicated counts of individuals and families experiencing homelessness. Through HMIS, a community should be able to collect information from projects serving homeless families and individuals to use as part of their needs analyses and to establish funding priorities. The HEARTH Act also codifies into law certain data collection requirements integral to HMIS. With enactment of the HEARTH Act, HMIS

Orange County HMIS Policies and Procedures

participation became a statutory requirement for recipients and subrecipients of CoC Program and Emergency Solutions Grants (ESG) funds.

An HMIS can be used to:

- Produce an unduplicated count of persons experiencing homelessness for each CoC
- Describe the extent and nature of homelessness locally, regionally, and nationally
- Identify patterns of service use
- Measure program effectiveness

The ensuing set of HMIS Policies and Procedures documents the Orange County CoC's operation of its HMIS and acts as a guide to its continuing operation in compliance with the CoC and ESG Regulations and Interim Rules. The HMIS Policies and Procedures have been developed in mind to further the following HMIS Goals:

- Assist in facilitating the coordination of care for homeless and at risk of homelessness populations.
- Ensure accurate data about the nature of homeless services and clients in the Orange County CoC.
- Ensure accurate data about the nature and extent of prevention and diversion services provided to households at risk of homelessness in the Orange County CoC.
- Collect data that fulfills federal, state and local requirements for homeless reporting and inform system gaps and resource development

II. Policies and Procedures Summary

This document serves as the minimum standards of participation in the Orange County HMIS and represents general best practices. Operational standards in this document are not intended to supersede grant specific requirements and operating procedures as required by funding entities.
