

What are the HUD System Performance Measures?

A key aspect of the McKinney-Vento Homeless Assistance Act, as amended by the HEATH Act, is a focus on viewing the local homeless response as a coordinated system of homeless assistance options as opposed to independently operating programs and funding sources. Because of this change, Continuums of Care (CoCs) are now required to measure their performance as a coordinated system. The System Performance Measures (SPM) allows CoCs to regularly measure their progress in meeting the needs of people experiencing homelessness in their community and to report this progress to HUD.

The SPM is pulled from the local Homeless Management Information System (HMIS) and submitted to HUD annually by CoCs around the country. The reporting period for all SPM reports is October 1st to September 30th. With the exception of Metric 3.1 which includes data from the Unsheltered Point-In-Time count, all data comes from Orange County's HMIS.

What gets measured?

There are 7 System Performance Measures, some made up of 2 to 4 submeasures or metrics. The measures are:

- Measure 1. Length of time persons remain homeless
- Measure 2. The extent to which persons who exit homelessness to permanent housing destinations return to homelessness
- Measure 3. Number of homeless persons
- Measure 4. Jobs and income growth for homeless persons in CoC Program-funded projects
- Measure 5. Number of persons who become homeless for the first time;
- Measure 6. Homelessness prevention and housing placement of persons defined by Category 3 of HUD's homeless definition in CoC Program-funded projects
- Measure 7. Successful housing placement

Orange County submits measures one through five and seven to HUD annually. Measure 6 has yet to be applicable to any CoC.

What is included in this report?

This report contains a comparison of Orange County's performance on certain System Performance Measures for each funding year (10/1 - 9/30) from 2019 to 2023. This report will be updated on an annual basis after 211OC completes the final analysis for that year's System Performance Measures submission.

For measures with multiple sub-measures, we have chosen to highlight the most comprehensive sub-measure or metric. For example, Measure 4, Employment and Income Growth for Homeless Persons in CoC Program-funded Projects, includes 6 metrics that differentiate sources of income a client may receive. In this report, we focus on metrics 4.3 and 4.6 which include all income sources.

To view all of Orange County's System Performance Reports submitted to HUD, please visit ochmis.org.

What is Orange County's bed participation information?

Project Type	Non-DV Beds on HIC	HMIS Participating Beds	HMIS Participation Rate
All ES, SH	2634	2494	95%
All PSH-OPH	4980	4980	100%
All RRH	1084	1084	100%
All TH	729	356	49%

National System Performance Measures data is released by HUD each year for the previous funding year's analysis. Throughout this report, look for orange boxes that will show you how Orange County compared to California and the United States in 2022.

The extent to which data is missing or incomplete in HMIS affects the accuracy of the metrics on the System Performance Report. Look for teal boxes throughout the report that will let you know when and if a measure is affected by data quality.

Measure 1

Length of Time Persons Remain Homeless

Measure 1 contains two sub-measures. Both submeasures calculate the average lengths of time (in days) spent homeless for clients active during the reporting period. The goal for this measure is for the average lengths of homelessness to decrease each year.

Measure 1a looks at clients in Emergency Shelter (ES), Safe Haven (SH), and Transitional Housing (TH) projects.

The measure is calculated using clients' length of time in the project strictly as entered in HMIS.

Orange County's average length of time in ES-SH-TH is 184 days compared to California's 158 days and the United States' 118 days.

Measure 1a: Clients in ES, SH, and TH

Measure 1b looks at clients in Emergency Shelter, Safe Haven, Transitional Housing, Permanent Housing (PSH), Other Permanent Housing (OPH) and Rapid Re-Housing (RRH) projects.

The measure is calculated using data from the start of clients' current episode of homelessness through either the date they are housed or exit the project.

Note: Since this measure began, calculation methods have changed multiple times. These changes resulted in scores, particularly for Measure 1b, that vary from year to year due to methodology changes and not necessarily changes in the length of time people experience homelessness.

Measure 1b: Clients in ES, SH, TH, and PH

This measure is calculated using the client's self-reported date their current episode of homelessness began, and does not include the client's entire history of homelessness.

Measure 2 Returns to Homelessness

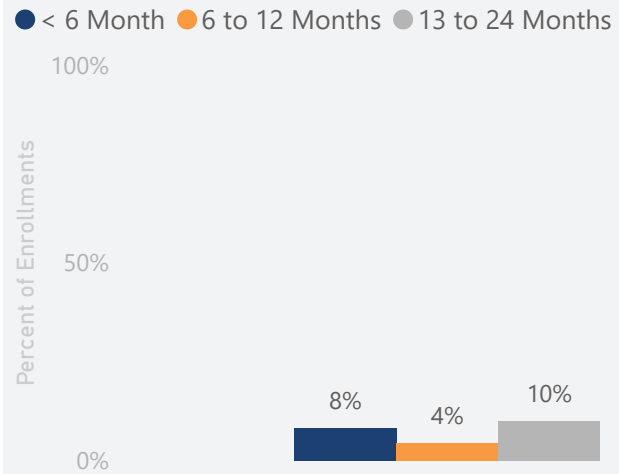

Measure 2 looks at the percentage of clients who exit to a Permanent Housing destination during the reporting period plus one year prior to the report start date, and subsequently return to homelessness within 6, 12, or 24 months. This measure helps CoCs determine the effectiveness of their coordinated efforts at keeping people from falling into homelessness after having received CoC services. The goal for this measure is to decrease the number of people falling back into homelessness each year.

The chart to the right shows when clients returned to the homeless system after exiting to a permanent housing situation.

The charts below show a year over year look at what percentage of clients exited to Permanent Housing and returned to homelessness within 2 years for each project type.

Orange County's score for total returns to homelessness within 2 years was 17% compared to California's 18% and the United States' 16%.

OC 2023 Returns to Homelessness

Returns From Street Outreach

Returns From Emergency Shelter

Returns From Transitional Housing

Returns From Permanent Housing

Measure 3 Number of Homeless Persons

Measure 3 directly assesses a CoC's progress toward eliminating homelessness by counting the number of people experiencing homelessness both at a point in time and over the course of a year. The goal for this measure is for the total counts of people experiencing homelessness to decrease each year.

Metric 3.1 is a count of sheltered clients using Point-In-Time Count (PIT) data. This data comes from the PIT count data submitted to HUD, which includes projects that participate in HMIS and projects that do not participate in HMIS.

Unsheltered counts occur every other year in January during odd numbered years. The previous year's count is used for even numbered SPM years.

Metric 3.1: Point-in-Time Count of Sheltered and Unsheltered Persons

Metric 3.2 is a count of clients using HMIS data from ES, SH, and TH projects. This data is unduplicated across all applicable project types, meaning that if a client enrolls in the same project type twice during the reporting period, they are represented in this number only once.

Metric 3.2: Unduplicated Total Sheltered Homeless Persons

The table below shows 2022 data for Metric 3.2 for Orange County CA-602 and surrounding continuums of care.

Jurisdiction	Total Population	Unduplicated Total Sheltered Homeless Persons (3.2)	% of Population Experiencing Homelessness (3.2)	% of California's Homeless Population (3.2)
Los Angeles (CA-600) + Long Beach (CA-606)	9,721,138	38,301	0.39%	28%
San Diego (CA-601)	3,276,208	12,654	0.38%	9%
Orange County (CA-602)	3,151,184	6,968	0.22%	5%
Riverside (CA-608)	2,473,902	4,701	0.19%	3%
San Bernardino (CA-609)	2,193,656	2,659	0.12%	2%

Measure 4

Increase in Income For Adults in CoC Funded Projects

Measure 4 is comprised of 6 metrics which measure the percentage of adult clients enrolled in CoC funded projects who have increased their earned and non-employment cash income during the reporting period.

Measures 4.3 and 4.6 calculate the percentage of stayers and leavers who have increased their *total* income, irrespective of income source. The goal for this measure is for the percentage of clients with increased income to increase each year.

Metric 4.3 represents the percentage of adult stayers (clients still enrolled in the project as of the end of the reporting period with a length of stay of at least 365 days as of the end of the reporting period) who have an increase in total income recorded in HMIS.

Metric 4.3: Stayers with Increased Income

Metric 4.6 represents the percentage of adult leavers (clients who exited the project before the end of the reporting period) who have an increase in total income recorded in HMIS.

Metric 4.6: Leavers with Increased Income

Measure 5

Number of Persons Who Become Homeless for the First Time

Measure 5 allows CoCs to track and assess whether they are effectively reducing the number of people who become homeless by analyzing the number of people experiencing homelessness for the first time. The goal for this measure is for the number of people experiencing homelessness for the first time to decrease each year.

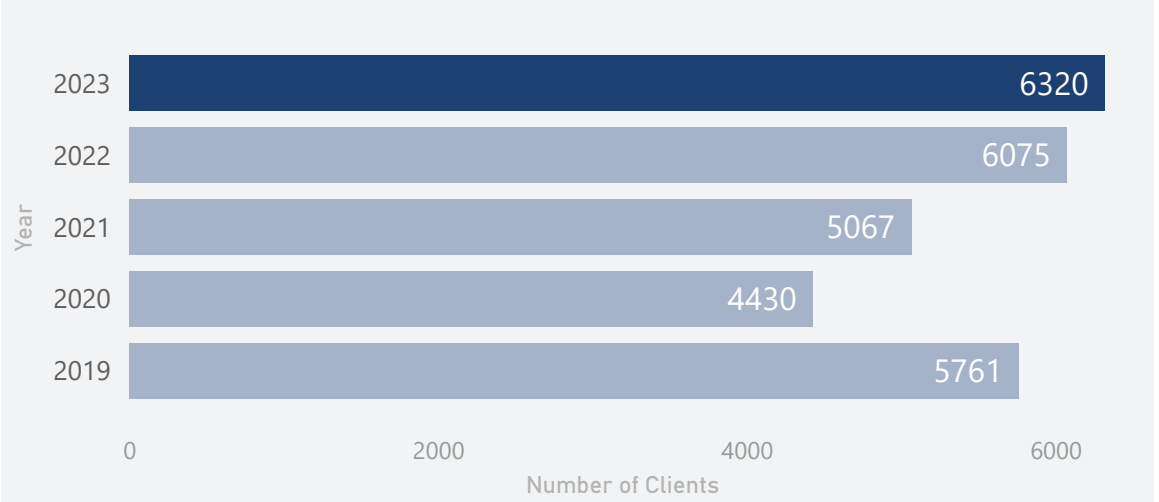

Metric 5.1 reports the change in the percentage of persons entering Emergency Shelter, Safe Haven, and Transitional Housing projects who have no prior enrollments in HMIS.

Metric 5.1: First Time Homelessness in ES, SH, and TH

Metric 5.2 reports the change in the percentage of persons enrolling in any of the project types mentioned in Metric 5.1 plus Permanent Housing who have no prior enrollments in HMIS.

Metric 5.2: First Time Homelessness in ES, SH, TH, and PH

The table to the right shows 2022 data for Metric 5.2 for Orange County CA-602 and surrounding Continuums of Care.

Jurisdiction	Total Population Experiencing Homelessness for the First Time (5.2)	% of California's Population Experiencing Homelessness for the First Time
Long Beach (CA-606)	1,437	1%
Los Angeles (CA-600)	21,843	20%
Orange County (CA-602)	6,075	6%
Riverside (CA-608)	5,033	5%
San Bernardino (CA-609)	3,856	4%
San Diego (CA-601)	9,678	9%

Measure 7

Successful Placement From Street Outreach and Successful Placement in or Retention of Permanent Housing

Measure 7 is comprised of three metrics that report on the ability of a CoC to exit its clients to successful destinations or for those enrolled in Permanent Housing projects, their ability to maintain Permanent Housing. Destinations that are considered successful vary between project types. The goal for this measure is for the percentage of successful outcomes to increase each year.

Successful destinations from SO projects include almost all known destinations other than jail or the streets because it represents a client moving from an unsheltered to sheltered living situation.

Orange County's score for successful exits from Street Outreach was 16% in 2022, compared to California's score of 20% and the national score of 32%.

Due to the nature of Street Outreach projects, clients are frequently exited without providing Destination data, resulting in an error rate of 61%.

Metric 7.a1: Successful Exits From Street Outreach

Because the goal and function of project types in Metric 7.b1 is to move clients into permanent housing, destinations considered "successful" for these project types are Permanent Housing situations.

Orange County's score for successful exits from ES, SH, TH, and RRH was 37% in 2022, compared to California's score of 32% and the national score of 34%.

Due to the nature of Emergency Shelter projects, clients are frequently exited without providing Destination data, resulting in an error rate of 40%.

Metric 7.b1: Successful Exits From Emergency Shelter, Safe Haven, Transitional Housing, Rapid Re-Housing

Measure 7.b2 represents the percentage of enrollments in Permanent Supportive Housing and Other Permanent Housing projects with a Housing Move-In Date which either were still enrolled or had exited to a Permanent Housing destination as of the end of the reporting period.

Orange County's score for retention of permanent housing or permanent housing exits from PSH-OPH was 99% in 2022, compared to California's score of 97% and the national score of 96%.

Metric 7.b2: Retention of or Exit to Permanent Housing from PSH or OPH
