

## Orange County Continuum of Care Homeless Management Information System Client Consent form

Welcome to the Orange County Continuum of Care (CoC).

You are currently accessing services from an entity participating in the Orange County Homeless Management Information System (HMIS). HMIS is the secure database used to collect and store information about clients served through this entity. It also allows the sharing of information among HMIS participating entities to streamline access to services and help them understand a client's history of homelessness or housing instability. HMIS is managed and operated by Orange County United Way's 2-1-1 Orange County (211OC).

In Orange County, all entities that participate in HMIS share data with each other to coordinate care and improve program outcomes. If you agree to participate in HMIS, this means you allow information gathered by a participating entity to be entered into HMIS and allow all other participating entities to view and use your data to provide services to you. Additionally, the entity will also be able to see what kind of services in Orange County you have received in the past.

A complete list of all entities that participate in the HMIS is maintained at <http://ochmis.org/about-hmis/contributing-agencies/>. You can also ask the entity you are receiving services from for a list of HMIS participating entities. Please note that the list of entities contributing data to HMIS can change frequently and without notice, and therefore the website should be consulted for the most recent list.

HMIS contains sensitive health and personal data. The Orange County CoC and HMIS participating entities take your privacy very seriously and have implemented **the following protections to safeguard your data:**

- Individual client data is only viewable by trained staff at each participating entity.
- In order to participate in the HMIS, leaders at each agency must sign an Entity Agreement that includes a commitment to protecting client data and maintaining confidentiality.
- In order to use HMIS, entity staff must complete multiple trainings that examines privacy laws and the importance of client privacy.
- The HMIS is hosted on a secure server and data is encrypted.
